

# VIKING

THE WORLDWIDE  
DIVING STANDARD

## SIZE CHART

### - Viking ProAm & ProHd

#### SIZES & MEASUREMENTS

The measurements shown in these tables are the ACTUAL finished suit measurements. The best result will be obtained by taking the measurements of the diver wearing the undersuit that he proposes to wear under the drysuit. Remember to allow for movement inside the suit and to allow for activities like climbing up steps or a ladder. You should allow at least 7 cm additional leg length for this reason. So, if a diver has an inside leg length to floor of 90 cm / 35", you should look for a suit with a leg length of approx. 97 cm / 38".

**Body loop** means measured from dip at throat, down to crotch, and up to bone at base of neck. **Arm T** means standing with arms outstretched in a straight line, measure from wrist bone across back to wrist bone.

#### SIZE CHART

[cm / inches]	Size SML	Size MED	Size LGE	Size EXL
Diver Height	162 - 167 5' 4" - 5' 6"	172 - 177 5' 8" - 5' 10"	182 - 188 6' 0" - 6' 2"	190 - 195 6' 3" - 6' 5"
Chest	132 / 52"	152 / 60"	172 / 68"	177 / 70"
Waist	111 / 44"	119 / 47"	124 / 49"	132 / 52"
Hip	116 / 46"	127 / 50"	134 / 53"	137 / 54"
Crotch - Floor	83 / 33"	86 / 34"	86 / 34"	94 / 37"
Body Loop	152 / 60"	172 / 68"	185 / 73"	200 / 79"
Arm T	162 / 64"	167 / 66"	177 / 70"	180 / 71"
